TINYHOME
AFRICA

THE TINYHOME AFRICA BUILD SYSTEM

1. LIGHT STEEL FRAME

Precision-engineered light steel framing for exceptional strength, dimensional accuracy, durability and complete pest resistance.

2. FLOOR FRAME

Steel floor frame combined with 18mm filmfaced structural plywood creates a rigid, moisture-resistant foundation built to withstand transport and everyday living.

3. INTERIOR CLADDING

Premium Melawood or natural birch plywood, providing a warm, modern appearance that is durable, low maintenance and perfectly suited to tiny home living.

4. WETROOMS

Waterproof tileable boards and integrated sunken shower trays, creating a fully waterproof system designed for long-term performance.

5. INSULATION

High-performance glass wool cavity insulation combined with a breathable membrane delivers excellent thermal comfort, acoustic performance and moisture management.

6. WINDOWS & DOORS

Custom powder-coated aluminium windows and doors fitted with 6.38mm laminated safety glass for superior strength, security, UV protection and energy efficiency.

7. EXTERIOR CLADDING

Low-maintenance Colorplus steel cladding, complemented by natural timber detailing, creates a timeless exterior that is built to withstand South Africa's diverse climates.

8. CUSTOM CABINETRY

Every kitchen, bathroom and storage solution is custom designed and manufactured in-house to maximise functionality, storage and everyday comfort.

9. SOLAR POWERED

Solar-ready and can be equipped with complete off-grid solar systems, allowing you to enjoy sustainable, independent living wherever you choose.

10. FIREPLACE HEATING

High-performance glass wool cavity insulation combined with a breathable membrane delivers excellent thermal comfort, acoustic performance and moisture management.

11. GAS GEYSER & GAS STOVE

Efficient gas hot water systems and cooking appliances reduce energy consumption, provide instant hot water and are ideal for off-grid or backup power living.
